

Summer Clinic Check List

- **Helmet**-An ASTM-SEI approved riding helmet must be worn for all horse activities both mounted and un-mounted.
- **Riding Boots**-Boots are not provided. It is the camper's responsibility to bring a pair of paddock boots, tall boots, half chaps or whatever type of approved riding footwear is required, and are most comfortable wearing. (Sneakers or rubber boots may be worn during UN-MOUNTED activities).
- **Breeches**: The right size breeches will help protect the rider's legs, as well as maintain contact with the saddle and horse.
- **Fly Spray**-Insects and flying pests can make an otherwise enjoyable experience completely miserable for both horse and rider. Please Bring bug repellent. (Fly spray for the **horses** is provided).
- **Sunscreen**: Protection from the sun's harmful UV rays is a top priority. We will be outdoors (unless weather permits and will then ride indoors) so sunscreen is recommended.
- **WATER**-Please provide your child with PLENTY of water to stay hydrated.
- **Snack**-Campers will have a break to enjoy a quick snack (We do not have the capacity to hold foods that need to be refrigerated so should your snack need to be kept cold please pack an ice-pack).

Should you have questions about riding apparel or need an idea of where to purchase please let me know.
